

DEEP BED FILTER COLUMN

RB 249

Description:

Deep bed filtration is used for removal of total suspended solids (TSS). Materials such as Sand are used as filters for capturing the unwanted particles.

Specifications:

- Plexi glass column
- Polyethylene tank
- Flow measuring system
- Pressure measuring system in 16 different points of the column
- Centrifugal pump
- Ruler
- Installation and training video included
- Instructions manual included
- 10-year warranty

Note: Direct contact with the sales department is required to confirm the last updated technical specifications and pictures.

Applications:

1. Determination of the head loss at different heights along the column.
2. Continuous and batch filtering
3. Measuring pressure drop through the filtering bed.

Required For Operation:

- 220V Single Phase Electricity
- Distilled Water
- Desirable Temperature (°C): 10-30
- Relative Humidity: 15% - 80%

Dimensions (L*W*H) mm: 2300x 800 x 2700
